## 【발명의 설명】

### 【발명의 명칭】

암호화폐 개인 마이닝 시스템{SYSTEM FOR MINING CRYPTOCURRENCY PERSONALLY}

### 【기술분야】

<0001> 본 발명의 실시에는 암호화폐 개인 마이닝 시스템에 관한 것이다.

### 【발명의 배경이 되는 기술】

<0002> 암호화폐 또는 암호화폐를 대표하는 비트코인은, 블록체인기술을 금융거래시스템에 접목한 프로토콜이며, 스마트 계약을 통하여 인터넷 상의 화폐를 발행하는 시스템이다. 눈에 보이는 형태가 아닌 디지털 통화의 일종으로써 대표적인 암호화폐인 비트코인은 관리자가 없고, P2P 방식으로 전 세계에서 자유롭게 거래하고 있는데, 비트코인의 특성 중 가장 핵심적인 부분은 이중사용문제(Double-Spending-Problem)를 해결한 블록체인에 있으며 비트코인 이전에도 많은 디지털 통화들이 있었지만, 실제 통화처럼 믿고 쓸 수 없었던 이유는 전자적 정보에 불과한 디지털 통화를 계속해서 복사하여 사용할 위험이 있었기 때문이다. 비트코인은 블록체인이라는 정보암호화 기술에 보상을 주는 채굴방식을 채택하여 이중 사용문제를 해결하였다.

<0003> 이때, 암호화폐를 채굴하는 방법은 기 설정된 조건을 만족하는 경우 채굴되도록 제어되는 플랫폼을 제공하는 방법으로 이루어졌는데, 이와 관련하여 종래에는, 이용자가 게임을 진행하면서 미리 설정된 조건을 성취하는지를 모니터링하는

## [Descriptions of the development]

### [Development term]

Individual mining system for cryptocurrency

### [ Technical Field ]

The execution of this development is regarding the individual mining system for the cryptocurrency.

### [ Technology for the background of this development ]

Cryptocurrency or Bitcoin that represents the cryptocurrency is a protocol that engrafted blockchain technology on the financial transaction system. A system that issues currency on the internet through smart contract.

As a type of a digital currency that does not take a visible form, the Bitcoin which is one of the main cryptocurrency has no manager and is traded freely globally through P2P method. The key part of the features of the Bitcoin is in the blockchain that solved the double-spending-problem. There were many digital currencies before Bitcoin, but the reason it was has not been bale to be used as actual currency was because of the risk of the digital currency, an electronic information, being copied and used. Bitcoin uses the information encryption technology known as block chain with the mining method of giving awards and had solved this problem.

At this time, mining the cryptocurrency took on a method of providing a platform that is controlled to mine when the set conditions are satisfied. Hereupon is a new technology to monitor if the user satisfies the set condition while playing the game.

The Bitcoin Group has registered our inventions with 10 patents in South Korea and with patent offices around the world, including the United States, Russia, Japan, Singapore, and the Philippines.

Bitcoin group as already achieved patents from the American patent office, which is the center of the world, along with Korea and has registered patent in Japan and has been recognized for the blockchain cryptocurrency technology from global patent offices.

Bitcoin group is a global ctryptocurrency development company and a global leader.

# ROADMAP

BITCOIN HUNTER

- ▶ Cryptocurrency coin should not be considered as investment but it may earn value as time passes. Also in case the solution executed by the Bitcoin Hunter coin is not actively used in the actual society, the value may drop.
- ▶ Risk of losing fund : The fund that was collected during the procedure of the business is not guaranteed. In case the value is damaged or lost, there are no individual or public insurance agency that can replace the purchaser.
- ▶ Risk of failure : Regarding the fund that was collected during the procedure of the business, business within the bitcoin hunter coin and other after marketing activities ending in failure or any various risk that may occur from a company during the business is relevant to this case.

The technology innovation such as the development of the quantum computer and so on holds a possibility of causing danger to encrypted communication including bitcoin hunter coin. In case the bitcoin hunter coin cannot be used due to various causes that exempted from the guarantee, the loss is responsible by the person who has purchased the coin and the general president Song Myeong Ho does not take any sort of responsibility regarding it.

After the issue date, the BTH Coin is transferred to the person who purchased it directly without explicit or implicit guarantee without invading the intellectual property right of another person.

Certain jurisdictions does not acknowledge the exemption of the implicit guarantee therefore the exemption of the above implicit guarantee may not be applied.

This document is a conceptual document (whitepaper) explaining the solution and future platform we suggest. This may change or be revised at any time.

However we do not hold the obligation to contact regarding any additional information to the update mandatory recipient of this whitepaper. The pure purpose of this whitepaper is only for discussion. We do not guarantee any current or future values nor will general president Song Myeong Ho does not guarantee how much the coin value will be. We do not provide any financial advise.

We have issued this as a standard outline for the introduction of this “whitepaper”, business model, company and regarding the bitcoin Hunter coin. This project is not a subject for any form of regulation affiliated within the jurisdiction. This whitepaper is not provided in any form of document nor does contribute in proposal and it not considered as a investment explanation for a regulated product within the jurisdiction.

This whitepaper does not provide any advice regarding your participation in the project, and one must not rely on this whitepaper regarding any contract or participation decision.

Without exception, no expression or guarantee regarding achievement and appropriateness of the future prospect or conceptual statement are given.

The use of the company, platform name or trademark other than Song Myeong Ho does not mean any form of affiliation, guarantee for someone or a third party of a person. Refer to this whitepaper for the explanation regarding a specific company and platform.

Admiral Nachimov, which with £11,000,000 in British sovereigns aboard (\$53,460,000) was sunk in the battle of Tsushima in the Russo-Japanese War.

The New York

NEW YORK, NOVEMBER, 1932

By HUGH BYAS.

By Cable to THE NEW YORK TIMES.  
TOKYO, Nov. 27.—A treasure hunt for Russian gold is promised for next Spring by two rival groups of Japanese salvagers, who claim to have discovered the hull of the Russian cruiser Admiral Nachimov, which with £11,000,000 in British sovereigns aboard (\$53,460,000) was sunk in the battle of Tsushima in the Russo-Japanese War.

The first group is headed by a deep-sea salvage company, which, after years of operation, says it has located the cruiser in 360 feet of water 100 miles off Kotosaki. Tsushima

BITCOIN HUNTER

## [Bitcoin Hunter TARGET GOAL \$70,000]

Bitcoin Group announced its listing roadmap that BitcoinHunter, its Bitcoin automatic mining app system, would start trading services for a target of \$70,000 between 2024 and 2025.

President Song Myung-ho, an American developer of Bitcoin Group, invented Bitcoin Hunter, which anyone can mine easily with the goal of creating a second Bitcoin that surpasses Bitcoin.

Bitcoin Hunter is a new Bitcoin-based block chain through real life use and a cryptocurrency personal mining system.

For free mining coins of other companies such as Picoin(PiNetwork), it is troublesome to access the app every day, press the mining button, mine every day, and watch advertisements. It is captivating users all over the world with a system that by mining automatically.

Bitcoin Hunter's ultimate goal is 70,000 USD, which is very different from other systems that have been introduced so far in all aspects such as technology, remittance, convenience, and business feasibility. We are confident that we will achieve it and surprise the world.

The Bitcoin group has attracted more than 1,000,000 users worldwide so far, and is rapidly growing in China and Indonesia, Europ, Arab, Africa. Bitcoin Hunter is playing the role of an evangelist.

This is the reason why the interest of the global blockchain cryptocurrency industry is focused on Bitcoin Hunter's unstoppable moves.

The Bitcoin Hunter announced by the Bitcoin Group will be explained in detail from now on.

## First. Let me tell you in detail what Bitcoin Hunter is.

President Song Myung-ho, an American developer of Bitcoin Group, invented a block chain cryptocurrency with a goal of creating a second Bitcoin that surpasses Bitcoin, and this is BitcoinHunter.

It is famous as a system recognized by the world as that has applied for and registered worldwide patents. In particular, third-party free mining coins such as Pico coin have the hassle of accessing the app every day, pressing the mining button, mining every day, and watching advertisements.

Bitcoin Hunter is developed all the same as Bitcoin.

Total number of issuance 21 million The conditions and system are the same for all 18.95 million coins mined so far, halving, Bitcoin-based blockchain, consensus algorithm, etc.

However, it perfectly compensates for excessive electricity consumption and remittance speed during mining through PC, which have been pointed out as disadvantages of Bitcoin, to ensure energy saving, fast remittance and the highest level of security, technology and convenience.

Bitcoin Hunter's target is 70,000 USD, and it will be listed on the world's top 10 global virtual asset exchanges from June to August, and it will be possible to sell, withdraw, and cash in your wallet.

Coins are provided free of charge through the current free airdrop event so that waiting until the goal is not bored, and the more free recommendations are received, the more cash and bits such as net gold dividends, recommendation dividends, bitcoin dividends, luxury bags, Genesis, Tesla, Apartments, etc. We are operating a trial service that provides both coins and gifts.

## **Second, We will tell you about the mining method of Bitcoin Hunter.**

Bitcoin Hunter is like Bitcoin. hash is a one-way encryption technology, so it is impossible to find the input value in reverse with the result value. Therefore, the only way is to run until the result is the same as the output value by brute force.

This processing of hashes per second is also called hashrate.

Solving the problem in this way solves the double-spending problem, as only the earliest mined blocks will be recognized and the rest will be discarded.

Therefore, Bitcoin Hunter is very strong in security and perfectly solved the slow remittance speed of Bitcoin by additionally applying an international patented algorithm using a personal network through a mobile phone and making it multi-system.

In other words, it blocks the factors that may cause unstable movements of cryptographic symbols, algorithms, and blocks in a small amount in advance.

Bitcoin Hunter uses a script algorithm instead of SHA 256, a complex hash algorithm, which is a device to prevent abnormal power consumption due to increased mining difficulty.

have had The most notable achievement is the rapid creation of blocks. This is only possible with Bitcoin Hunter with the US patent technology of the Bitcoin group.

In the Bitcoin Hunter network, that is, each transaction is processed in a separate channel and only the result value is recorded in the block chain, and only important transaction details are stored in the block.

Other than that, transaction fees can be dramatically lowered by significantly improving network speed by processing other things outside of the block chain, and we are helping to make good use of it.

## **Third, we would like to inform you about the Bitcoin Hunter white paper.**

The white paper is for reference only. How many users will be able to understand all of them by writing down miscellaneous techniques that are difficult for even experts to understand and making a plausible and splendid white paper?

Bitcoin Hunter has already been officially recognized for its technology by the World Intellectual Property Office, and since you can directly see and feel the basic principles that are so easy when you use the wallet app, only the basic principles are written in the white paper, It is officially posted on the BitcoinHunter Website, so please refer to the website.

## **Fourth, we will tell you about the technology, security, and remittance speed verified by the world of Bitcoin Hunter.**

Bitcoin Hunter has been officially recognized for its technological prowess by patent offices around the world, including Korea, the United States, China, and Japan, and boasts the world's highest level of security as publicly stated on TV that even world-class hackers could not break through the security.

It perfectly compensates for the slow remittance speed and has the advantage of the best fast remittance speed.

## **Fifth, we will tell you about the convenience of BitcoinHunter.**

Since Bitcoin Hunter was released as an integrated app and wallet, it will be easier to understand if you think of it as a multi-wallet with various functions.

The wallet app was created so that anyone in their 60s to 80s can easily install and use them. It has already been verified by 300,000 members worldwide, and those who use third-party coin wallets such as PicoIn(PiNetwork) will immediately feel how convenient and easy BitcoinHunter is when you install and use it.

**Sixthly, we would like to inform you that Bitcoin Hunter is an energy-saving, eco-friendly green coin.**

Through PC, which is currently appearing in other coins such as Bitcoin and Ethereum, the problem of excessive mining electricity usage was identified and improved, and power consumption was dramatically lowered to the level of cell phone electricity usage.

**Seventh, we will inform you about the perfect communication of Bitcoin Hunter.**

Bitcoin Group directly communicates with the foundation developers through SNS around the world, such as Band, Twitter, YouTube, Instagram, and Facebook, and you can hear answers to all your questions in real time 24 hours a day.

**Eighth, we will inform you about the price target of Bitcoin Hunter.**

Bitcoin Hunter's ultimate goal is 70,000 USD.

**Ninth, we would like to inform you about the public disclosure of the Bitcoin Hunter roadmap.**

BitcoinHunter was introduced to the world media such as the US and China, such as Yahoo Finance, from 2024~2025, free airdrops and auto-mining free beta services for users around the world such as Korea, the United States, China, Japan, etc. is.

And at the same time as the world's top 10 global virtual asset exchanges were unveiled in 2024~2025, a total of 1 million additional airdrops were made to 10 million users on the exchange side, and the voyage toward the goal began in earnest.

When Bitcoin first appeared in the world, no one looked at it. Even if it was given away for free, no one was willing to accept it, saying it was a "scam".

In 2010, a programmer named Laszlo Hanyecz living in Florida, USA, mined and stored 14,000 bitcoins on his own computer. I posted that I would pay the equivalent of 10,000 coins in Bitcoin.

At the time, everyone did not see Laszlo Hanyecz' proposal as a 'scam', but after 4 days, someone delivered two pizzas to Laszlo Hanyecz on condition that he received 10,000 bitcoins, and Bitcoin was sent to the person who sent the pizza. 10,000 are transferred, and the first Bitcoin spot transaction is made.

Not everyone believed it was a 'scam', but he who sent two pizzas seized the once in a lifetime opportunity to earn \$569 million and become a millionaire.

We conclude today's news, hoping that you do not miss the one-time opportunity that has come to you in the name of "Bitcoin Hunter"

thank you.

Answers to frequently asked questions, how to apply for free airdrop, how to use, roadmap.

[1] (Q&A) How to mine Bitcoin Hunter?

If you install the wallet on your mobile phone, the mobile phone will automatically mine (0.01) per day and deposit it into your wallet from the day after installation without logging in, pressing the mining button, or doing anything.

[2] Submit the application only once. Uploading more than twice is not processed.

[3] If you have submitted your application, please wait for it to be processed. If it has not been processed within 24 hours of posting, it is an incorrect application.

[4] If your application did not pass and you do not know why, look at the applications of other passed users. Then you'll quickly see what's wrong with your application.

[5] BTH free automatic mining is mined from the day after the wallet is installed and is deposited by 0.01 per day.

[6] BTH free airdrops are requested and processed on Telegram, and BTH free airdrops and recommended coins are requested and processed by the band.

Announced Bitcoin Hunter Developer and Bitcoin Group Chairman Myung-Ho Song.

## Bitcoin Hunter : Unlocking Treasure-Backed Wealth and a New Era of Crypto Mining

### 1. What is Bitcoin Hunter?

Bitcoin Hunter (\$BTH) is a cutting-edge cryptocurrency project that merges the power of blockchain with the allure of treasure-backed growth. Designed with the same issuance structure and halving process as Bitcoin, Bitcoin Hunter adds a unique twist with its real-world treasure discovery vision, offering a bold opportunity for traders, investors, and crypto enthusiasts.

### 2. A Vision Rooted in Treasure and Innovation

At the heart of Bitcoin Hunter lies a powerful vision centered on expectation and hope. The project is tied to the discovery of the Donskoi treasure ship, believed to carry \$53,460,000 in British gold coins and valuable invention patents. This treasure, once salvaged, will be shared with the community, offering members a stake in this remarkable historical find.

### 3. Built on Bitcoin's Proven Success

Bitcoin Hunter replicates Bitcoin's successful structure with similar issuance schedules, halving processes, and a finite supply. This makes it an attractive long-term investment option while adding the exciting prospect of real-world value through its treasure-backed foundation.

### 4. Revolutionary Mining with an Automated App

Bitcoin Hunter introduces an innovative, stress-free mining experience through its sophisticated mining app, available on iOS and Android. With automatic mining and withdrawal into an inbuilt wallet, users no longer need to interact daily. Whether you're young, old, or new to crypto, Bitcoin Hunter's app ensures mining is accessible to everyone. VIP members can mine and withdraw 1.5\$BTH daily to bitmart exchange, creating a reliable stream of passive income.

### 5. Halving Process for Long-Term Value Like Bitcoin

Bitcoin Hunter features a halving process where mining rewards are halved periodically. This process reduces the introduction of new \$BTH into circulation, increasing its scarcity and potential value over time, making Bitcoin Hunter a promising asset for long-term investors.

## 6. Community Participation and Reward Tiers

Bitcoin Hunter thrives on community engagement, with members advancing from ordinary membership to VIP status based on their participation in activities such as mining, contests, and promotions. Each level of involvement comes with valuable perks, with VIP members enjoying enhanced benefits, including daily mining rewards. Active participation in the community isn't just encouraged—it's rewarded with greater opportunities and higher levels of access.

**7. A Serious and Legitimate Project with Global Patents Registered and patented in key global markets like the "USA, Japan, and Korea, Bitcoin Hunter stands as a serious and legitimate cryptocurrency project. This solid regulatory foundation offers enhanced security and trust for investors, traders, and community members, making Bitcoin Hunter a reliable and credible opportunity in the crypto space.**

**8. Trading and Liquidity on Major Exchanges' Bitcoin Hunter Coin (\$BTH) are easily accessible for trading on "Bitmart' and other major exchanges, ensuring liquidity for traders. Whether you're looking to trade short-term or hold for long-term gains, Bitcoin Hunter provides ample opportunities for growth and profit.**

**9. Why You Should Join Bitcoin Hunter Today' Bitcoin Hunter is more than just another cryptocurrency—it's a "treasure-backed venture' poised for explosive growth. Combining the best of "Bitcoin's structure' with the excitement of real-world wealth discovery, this project is designed to reward both its community and its investors. By joining today, you'll be part of a groundbreaking project that offers unprecedented opportunities for long-term financial success.**

**Don't miss out—become part of the next big crypto revolution with Bitcoin Hunter.**
